Minor Project

- Hostel Management System (Language : C)

Location: GP, Washim

Duration: 2 months

Team Size: 4

Brief Description: This Project targeted for the College Hostel integrates the transaction management of the Hostel for better control and timely response. This eliminates time delay and paper transactions being marked. The warden is provided with a better control over the transactions like adding the details of new students in the hostel, modifying the details of the students, deleting the students, viewing the students' details in the Hostel. This project's main motto is to reduce the effort of Wardens and provide better service to the students.

Individual Role: As a Team leader, I was responsible for making the objectives, developing the project, preparing project seminar, presentation, documentation and helped team members in accomplishing their tasks.

- Hospital Management System (Language: C)
- Portal For EBC (Language: HTML, PHP, CSS)

Major Project

- E-Commerce website

Location: RSCE Buldhana

Duration: 6 months

Team Size: 4

Brief Description: Designed and developed a fully functional eCommerce website, enhancing user experience and increasing sales by 30%. Leveraged technologies such as HTML, CSS, JavaScript, and modern frameworks to create a responsive, visually appealing site with seamless navigation and secure payment integration. Implemented SEO best practices and optimized site performance to drive higher traffic and improve conversion rates. Managed the end-to-end development process, including UI/UX design, front-end functionality, and third-party integrations.

Individual Role: As a Team Member, I was responsible for giving project seminars whenever required as I have a good hold on communication skills as well as good understanding on Programming. Work on html and CSS

Technologies used:

IDE Tools : vs code, notepad
Front End : HTML/CSS/Bootstrap/ JavaScript
Database/Back End : MY-SQL
Language Structure: HTML, CSS, JAVASCRIPT

➤ Project no 2

- Android Application for Online Bidding

Location: RSCE Buldhana

Duration: 6 months

Team Size: 4

Brief Description: Streamline and automate the bidding process to reduce manual effort and minimize errors. Explanation: Develop a user-friendly interface that allows vendors to submit bids electronically, automating bid evaluation, and notification processes. Objective: Enhance transparency by providing real-time bid tracking and status updates. Explanation: Enable bidders and stakeholders to track the progress of their bids, view bid status changes, and receive timely notifications about important updates. Objective: Create an intuitive and user-friendly interface to improve user experience. Explanation: Design the EBid platform with a user-centric approach, considering the needs of both buyers and suppliers. Provide clear navigation, helpful tooltips, and a responsive design for accessibility on various devices.

Individual Role: As a Team Member, I was responsible for giving project seminars whenever required as I have a good hold on communication skills as well as good understanding on Programming.

Technologies used:

IDE Tools : PyCharm
Front End : HTML/CSS/Bootstrap/ JavaScript
Database/Back End : MY-SQL
Language Structure: Python
